Press Release

DuoShare Approved for eLOT™ as CASS Certified™ Software Manufacturer

Dallas, Texas, January 21, 2005: DuoShare, Inc., is pleased to announce that it has certified for eLOT™ (Enhanced Line of Travel) as a CASS Certified Software Manufacturer with the United States Postal Service®. The Postal Service™ created the eLOT Data Product to allow mail to be presorted in approximate delivery order by adding carrier route sequence numbers to addresses. DuoShare PostalSM, the first J2EE™ CASS Certified postal address matching service, includes eLOT processing as a part of its comprehensive Address List Validation service. DuoShare Postal also utilizes DPV™ (Delivery Point Validation), Z4Change, and other USPS® data to ensure address accuracy and enable customers to qualify for postal discounts, such as enhanced carrier route discounts for eLOT processing.

“Our eLOT development represents a further commitment to provide presorting capabilities and related discount opportunities to our customers, and our commitment to the USPS to provide low cost mail automation services to mailers of all types,” states Stephen Buck, Vice President of DuoShare. The commitment to cost-effective mail automation is evident in DuoShare's unique pricing model. Instead of charging flat, per record or per user fees like its competitors, DuoShare charges only for value added to the process, which means customers receive a return on their investment with the first mailing, followed by increased savings on subsequent mailings.

In addition to affordability, DuoShare is committed to compatibility. DuoShare applications are written in the Java 2 Platform, Enterprise Edition (J2EE) programming language, providing the ability to run on virtually any computer hardware platform. This versatility allows DuoShare Postal to validate addresses and return them to a company's local system without the need for any additional platform-specific software. DuoShare's connectivity options can accommodate file import/export, interactive interface, Enterprise Messaging, and Web Services, making address quality services available and affordable to companies of every size.

DuoShare Postal Address ServicesSM are offered on a value-added processing unit basis, with no minimum charge, no contract, and no long-term commitment. For more information, call DuoShare or visit the website at <http://duoshare.com>.

DuoShare, Inc. is a privately held software services company based in Dallas, Texas, founded in 2001 to create specific business processes and services and deliver those via the Internet. DuoShare Postal is a small portion of a larger software application offering companies the flexibility to integrate key business functions in a vendor-neutral environment and at a reduced cost.
