Press Release

DuoShare Earns CASS™ Certification Ahead of Schedule

Dallas, Texas, May 3, 2005: Today, DuoShare, Inc. certified its address quality software with the United States Postal Service® for the year beginning August 2005. As the creator of the first Java J2EE™ CASS Certified™ postal address matching service, DuoShare originally certified as a CASS software manufacturer in December, 2003. While preparing to certify for CASS Cycle I, DuoShare's development team was already working to incorporate Cycle J concepts, which allowed the company to certify for Cycle J ahead of schedule. Stephen Buck, Vice President of DuoShare, is very pleased with the young company's performance. "We were the 9th company out of 39 well-established competitors to certify, which is huge for a new company like ours."

Created by the USPS® to improve address quality, CASS provides mailers, software vendors, and service bureaus with the ability to evaluate their address-matching software in accordance with USPS address standards. Because new requirements are added to the specification each year to continually enhance address quality, software must re-certify with each new CASS cycle. As of May 3, DuoShare PostalSM has met all requirements for Cycle J, which remains valid through July 2006.

By certifying well ahead of the deadline, the company is now focusing on NCOA^{Link™} development and list management features, thus continuing to provide more value to its customers at the same low price. DuoShare offers its customers full service assistance with address quality processing, and customers usually realize savings on their very first mailing, including DuoShare's processing charge.

DuoShare, Inc. is a privately held software services company based in Dallas, Texas, founded in 2001 to create specific business processes and services and deliver those via the Internet, offering companies the flexibility to integrate key business functions in a vendor-neutral environment and at a reduced cost.

- The following trademarks are owned by the United States Postal Service: CASS™, CASS Certified™, United States Postal Service®, USPS®.
