Press Release

DuoShare Receives CASS™ Certification for 2007/2008

Dallas, Texas, February 9, 2007: DuoShare, Inc., creator of the first 100% Web-based Address Quality Service, recently re-certified DuoShare PostalSM with the United States Postal Service®. The Coding Accuracy Support System (CASS™) improves address accuracy by providing mailers, software vendors, and service bureaus with the ability to evaluate their address-matching software in accordance with USPS® address standards. DuoShare PostalSM has met all requirements for the current certification process (Cycle L) which is valid through July, 2008.

Cycle L adds some of the most significant improvements to CASS since its inception which include:

- Required primary number validation through the use of Delivery Point Validation (DPV™) in order to assign a ZIP + 4 code.
- Required use of the Locatable Address Conversion System (LACS^{Link™}) which provides a new address when an address has been converted due to changes by government and municipalities.

These are just some of the changes that represent the United States Postal Service's® Total Address Quality Vision. Because DuoShare has always shared this vision, these requirements have been included in DuoShare's Address Quality Services since February 4, 2005, allowing for our fastest re-certification to date. According to Michael Harvanek, Manager of Postal Products and Services, "Supporting these requirements, well before they were mandated, proves our commitment to offering all-inclusive address quality products to our customers. That commitment, along with our distinctive solution, really makes us unique in the marketplace."

DuoShare, Inc. is a privately held software services company based in Dallas, Texas, founded in 2001 to create specific business processes and services and deliver those via the Internet.
